Firefox 3 Install Firebug Addon Software

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. My current version is disabled after upgrade. How do I install Firebug under Firefox 3 web browser?

A. You need to install Firebug 1.2 which requires Firefox 3. Firebug integrates with Firefox to put a wealth of development tools at your fingertips while you browse. You can edit, debug, and monitor CSS, HTML, and JavaScript live in any web page.

Just visit [addon page to download and install Firebug 1.2](#) ^[2] for Firefox 3.
