HowTo: Find the GNOME Desktop Version

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. How do I find out GNOME desktop version from a shell prompt or GUI?

A. Use `gnome-panel` command from shell prompt to find the GNOME version. The GNOME panel displays an area on your screen, which acts as a repository for the main menu, application launchers, and applets. Open terminal type the following command:

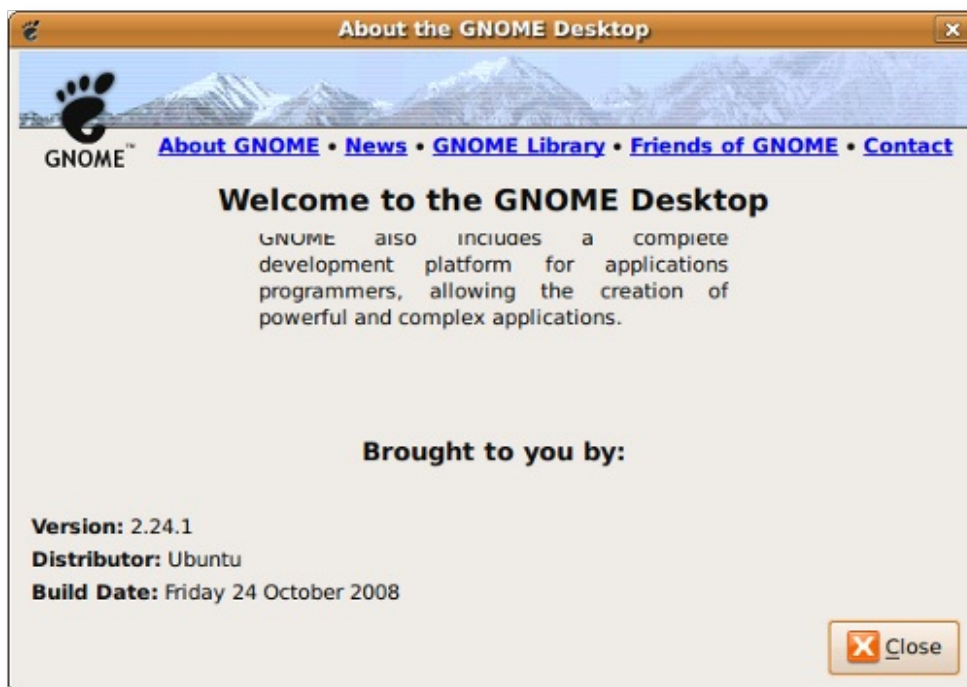

```
$ gnome-panel --version [3]
```

Sample output:

```
GNOME gnome-panel 2.24.1
```
