## Ubuntu Restart Network

Posted by [Vivek Gite](#) <[vivek@nixcraft.com](mailto:vivek@nixcraft.com)>

**Q.** How do I restart / stop / start networking under Ubuntu Linux system from a shell prompt?

**A.** You can easily restart, stop, or start networking service under Ubuntu Linux using a shell prompt. You can also restart networking remotely over ssh session (do not stop networking service over ssh session).

[1]

## Task: Restart networking under Ubuntu Linux

Open terminal (command line) and type the following command:

```
$ sudo /etc/init.d/networking restart
```

**To start networking service, enter:**

```
$ sudo /etc/init.d/networking start
```

**To stop networking service, enter:**

```
$ sudo /etc/init.d/networking stop
```
