GUI Tools for managing MySQL databases server

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. I am new to both Linux and MySQL database server. Can you provide any name of GUI tools for managing MySQL databases server remotely as well as locally?

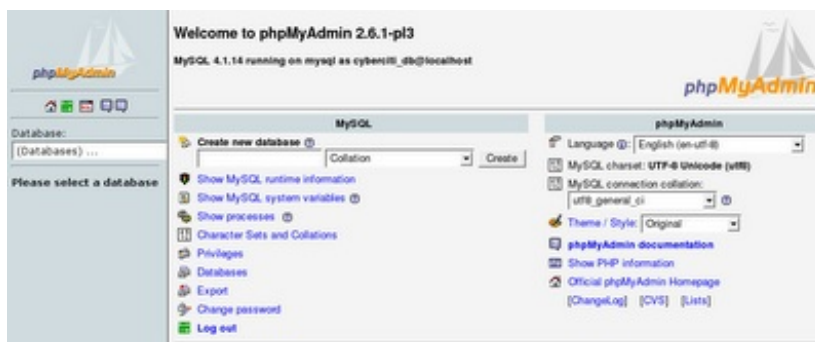

A. MySQL has various GUI tools for managing MySQL databases server remotely as well as locally. However not all software are free. Here are two best free tools:

1. **MySQL Administrator** - It is a powerful visual administration console that enables you to easily administer your MySQL environment and gain significantly better visibility into how your databases are operating. MySQL Administrator now integrates database management and maintenance into a single, seamless environment, with a clear and intuitive graphical user interface. Works with Windows XP, Mac OS X and Linux users. You can download this tool [here](#).

2. **phpMyAdmin** - a Very popular and runs over Web. phpMyAdmin is a tool written in PHP intended to handle the administration of MySQL over the Web. Currently it can create and drop databases, create/drop/alter tables, delete/edit/add fields, execute any SQL statement, manage keys on fields, manage privileges, export data into various formats. You can download this tool [here](#)
