Linux Virtual Network Interfaces Go Down When I bring Down eth0:0

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. My RHEL / CentOS Linux 4.x virtual network interfaces go down when I bring down eth0:0. How do I fix this issue?

[1]

A. This is well known issue can only be fixed by Upgrading to the latest version of glibc using up2date or yum command only.

yum update glibc

OR

up2date -u glibc
