Windows Displaying the Contents of DNS

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. How do I display the contents of my DNS client resolver cache under Windows server 2000 / 2003 / 2008 / XP / Vista operating systems?

A. In order to check the contents of your DNS client resolver cache and hosts file for correct entries, you need to use the ipconfig command under Windows operating systems.

Click on Start > Run

Type cmd and pree [Enter] key

At the DOS shell prompt type the following command:

```
ipconfig /displaydns
```

In order to [flush those records](#) ^[2], type

```
ipconfig /flushdns
```
