## Linux/UNIX: chmod error

Posted by [Vivek Gite](#) <[vivek@nixcraft.com](mailto:vivek@nixcraft.com)>

Q: Sometime when I use chmod command under Suse Linux, I am getting following error message:  
changing permissions of 'FILENAME': Operation not permitted

A: If you are using UNIX you will get error as follows:  
chmod: Not owner.

Remember, only the owner of a file or directory can set its permissions. Use ls -l to find the owner. Otherwise, login in as a root user and then setup permissions using chmod.
