Bash For Loop Spaces

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

How do I use bash for loop with spaces in a file name?

You can easily read file name with spaces in a for or while loop:

for loop with spaces example

[1]

```
O=$IFS
IFS=$(echo -en "\n\b")
for f in *
do
    echo "$f"
done
IFS=$O
```

To process all files passed as command line args:

```
#!/bin/bash
O=$IFS
IFS=$(echo -en "\n\b")
for f in $@
do
    echo "File: $f"
done
IFS=$O
```

while loop with spaces example

```
find . | while read file
do
    echo "$file"
done
```
