Ubuntu Linux: Start / stop / restart OpenSSH / ssh server

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. I need to provide remote access to my server. How do I start / stop ssh server under Ubuntu Linux 7.04 operating system?

A. You need to run script `/etc/init.d/ssh` to stop / start / restart OpenSSH server.

[1]

Start OpenSSH server

Type the following command:
\$ sudo /etc/init.d/ssh start

Stop OpenSSH server

Type the following command:
\$ sudo /etc/init.d/ssh stop

Restart OpenSSH server

Type the following command:
\$ sudo /etc/init.d/ssh restart
