Delete text or paragraph between two sections using sed

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. How do I use sed for selective deletion of certain lines? I have text as follows in file:

Line 1
Line 2
WORD1
Line3
Line 4
WORD2
Line5

[1]

I would like to delete all lines between WORD1 and WORD2 to produce final output:

Line 1
Line 2
Line5

A. For selective deletion of certain lines sed is the best tool. To print all of file EXCEPT section between WORD1 and WORD2 (2 regular expressions), use

```
$ sed '/WORD1/,/WORD2/d' input.txt > output.txt
```

Shell script to remove Javascript code

Here is my small script that reads all *.html files and removes javascript (script [download link](#) ^[2]).

```
#!/bin/bash
# ALL HTML FILES
FILES="*.html"
# for loop read each file
for f in $FILES
do
  INF="$f"
  OUTF="$f.out.tmp"
  # replace javascript
  sed '/<script type="text\/javascript"/,/<\/script>/d' $INF > $OUTF
  /bin/cp $OUTF $INF
  /bin/rm -f $OUTF
done
```

Above shell script removes all occurrence of javascript.
