Linux Rm A Folder And Contents

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

How do I remove a folder and all its contents including files and other folders?

You need to use the rm command. Use the -r option to remove the listed directories and their contents recursively. The syntax is:

[1]

```
rm -rf dirName
```

In this example, remove data directory and their contents recursively, enter:

```
rm -rf data
```
