FreeBSD: Forcefully unmount a disk partition to get rid of device busy error

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Under FreeBSD if you get error device busy while unmounting file system then you can forcefully unmount a disk partition or mount point. You can pass -f option to mount command. It forces the read/write mount of an unclean file system. Suppose you would like to unmount /cdrom forcefully then type command (login as a root user use su or sudo command):

```
# umount -f /cdrom
```

Where,

- -f : Forces umount to unmount a disk partition or mounted system
