Linux / UNIX: Clear bash history

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. I'm using CentOS Linux server and how do I clear bash history in UNIX / Linux / BSD operating systems?

A. Type the following command to clear your bash history:

```
>~/.bash_history
```

Another option is link ~/.bash_history to /dev/null:

```
ln -sf /dev/null ~/.bash_history
```
