Fedora core Linux sound card configuration

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. How do I configure Fedora Linux sound card using GUI and command line tools?

A. You can use GUI tool called redhat-config-soundcard to configure sound under Fedora or Red Hat enterprise Linux or Cent OS etc.

Just type the following command:

[1]

```
redhat-config-soundcard &
```

If you didn't hear any sound use aumix to setup sound volume:

```
aumix &
```

Or try GUI tool:

```
gnome-volume-control &
```
