Change 3d Compiz Settings

Posted by [Vivek Gite](#) <vivek@nixcraft.com>

Q. How do I change Compiz settings under Ubuntu Linux?

A. You need to install compiz configuration settings manager to change and update settings. Once compiz configuration settings manager installed, right click on Desktop > Select > Change Desktop background > Visual effects > Preferences

Now you can change settings and customize visual effects.

[1]

Install compiz configuration settings manage

Type the following command at prompt:

```
$ sudo apt-get install compizconfig-settings-manager
```
