PHP Print array

Posted by Vivek Gite <vivek@nixcraft.com>

Q. How do I print array with PHP?

A. You can easily print an array with php using print_r() function. It orints human-readable information about a variable including array.

[1]

```php
<?php
  $distro = array [2] ('r' => 'RedHat', 'd' => 'Debian', 'c' => 'CentOS ');
  print_r [3] ($distro);
?>
```

Sample Output:

```
Array
(
    [r] => RedHat
    [d] => Debian
    [c] => CentOS
)
```
